Beam: 16 meters
Draught: 4 meters
Maximum Speed: 12 knots
Propulsion: 2 Caterpillar 3608 DITA-4 machines (3,390 BHP/2,530 kW)

OVERVIEW

HS ATLAS I (A - 471) was built in 1999 at the YVC Ysselwerf B.V. shipyard in the Netherlands. From 2000 to 2018, under the name M/V STRILL NEPTUM, it was tasked with supporting oil extraction platforms in the North Sea through the transport of supplies, devices and personnel. It was received by the Hellenic Navy on 02-12-2019 after a donation by Mr. Panagiotis Laskaridis. It can accommodate 42 personnel.

The mission of the HS ATLAS I (A 471) is the logistical support of the Units of the Fleet Headquarters, mainly Frigates, Missile Boats, Gunboats and Unorthodox Warfare Vessels, with everything that is required – fuel, lubricants, drinking water, spare parts, and other consumable materials – so that they can operate away from the land bases.
